

May

The early bird gets the worm! Here at Omega school we are getting an early start on our pumpkins. We will start them in the school so that they'll have more growing time and hopefully become bigger this year. Together the students went online and chose all kinds of interesting pumpkins seeds to order. It will be interesting to see what we can produce. Pumpkins have many health benefits such as fibre, boosts vision, sleep better, have a healthier heart etc. And everyone loves Pumpkin pie!

On June 21 we are traveling to Winkler bible camp for our annual fieldtrip. All day long we will do fun exiting activities like wall climbing, canoeing, BMX bike racing and zip lining. Winkler bible camp also features a giant swing across the sky it feels like your flying,. So don't you miss it!
