

After a restful Spring Break, staff and students at Rock Lake Colony School are getting into a spring groove as we head into the homestretch of this school year!

Just before Spring Break, the High School class enjoyed an informative presentation from ISD's Mr. Gregovski on injury taping techniques. They learned how to wrap sprains and hyperextensions

resulting from sports and work related injuries. In April, they have been working hard to make sure they complete all the requirements for their current credits. Graduation is getting closer and closer for our two Grade Twelve boys!

Middle Years students have been working on making inferences in ELA. Inferring involves looking for clues in a text and then putting them together with your background knowledge, or schema, to figure out the parts of a story the author doesn't tell you directly.

The Early Years class has been learning about how to care for the Earth to celebrate Earth Day. They have been reading and writing about recycling and keeping things clean.
